ABOUT ME

B.Tech Computer Science Engineering (Artificial Intelligence & Machine Learning) student at Sri Sri University with a strong foundation in programming, data structures, and AI fundamentals. Skilled in Python, C, Git, and problem-solving, with experience in developing AI-based academic projects. Seeking an internship to apply technical skills, contribute to impactful projects, and gain practical industry experience in software development and artificial intelligence.

EDUCATION

Sri Sri University,kataka 2025-2029

B.Tech in Computer Science Engineering(AIML)

CGPA : 9.35

RELEVANT COURSEWORK : Data structure,Python programming,Artificial Intelligence,Machine Learning,Database Management,Systems

PROJECTS

1. Handwritten Digit Recognition using CNN

Technologies: Python, TensorFlow, NumPy, MNIST Dataset

- Developed a Convolutional Neural Network (CNN) model to recognize handwritten digits using the MNIST dataset.
- Preprocessed image data and trained the model for accurate digit classification.
- Evaluated model performance and improved prediction accuracy through training and testing.

2. Facial Emotion Recognition System

Technologies: Python, OpenCV, TensorFlow, CNN

- Developed a facial emotion recognition system using deep learning and computer vision techniques.
- Trained a CNN model to classify facial expressions such as Happy, Sad, Angry, Surprise, Fear, Disgust, and Neutral.
- Implemented image preprocessing and real-time emotion detection using OpenCV.

SKILLS

Programming Language

- Python
- C
- C++

AI & Machine Learning

- Machine Learning
- Deep Learning (Basics)
- Computer Vision

Libraries & Tools

- TensorFlow
- OpenCV
- NumPy
- Pandas
- Git & GitHub

Core Concepts

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
